

ShowCase Tabletop

Step 1

To set up case, release the two metal clasps and move case to a "V" position like the photo at the bottom of the page.

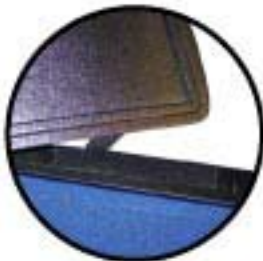

Step 3

To add an optional shelf, place the ends of the shelf into opposite slots on the inside of the display.

Step 5

To add the incandescent light, place the base of the light into the slot on the back corner of the display.

Step 7

Place the velcro brackets from the header down onto the velcro strips that are on the top of the display.

Step 2

To add the optional grid wall, place the ends into the slots on the inside of the display.

Step 4

To add the optional end panels, align the magnetic strip that is on the end panel to the magnetic strip on the display.

Step 6

To add the header, remove the backing on the bracket and place the bracket on the back of the header about 5 inches in from the end. Repeat on the other side of the header.
